

## REMARKS

Applicants graciously acknowledge the Examiner's request to complete the response of the reply filed on December 27, 2004 regarding the two rejections under 35 U.S.C. 112. Applicants, in accordance with the Examiner's rejection, have clearly indicated that the second appearance of the term "intermediate orbit" should be corrected to read "the intermediate orbits" in claims 1 and 23, and also in new claim 33. Applicants have amended the claims accordingly, thus obviating this ground of rejection under 35 U.S.C. 112.

Applicants apologize for this omission and hereby incorporate by reference the totality of the response filed on December 27, 2004 in response to the Office Action dated November 12, 2004. A copy of said response accompanies this communication for the ease and convenience of the Examiner's consideration.

In view of the previously filed response and this supplemental response as requested by the Examiner to obviate the two 35 U.S.C. 112 rejections, all of the claims presently under prosecution have been shown to contain non-obvious patentable subject matter and to be patentably distinguishable over the prior art previously cited. Applicants respectfully request that this supplemental communication, in addition to the originally filed response, be considered and this application reviewed in light thereof and that a Notice of Allowance be issued at an early date.

Respectfully submitted,

Anthony W. Karambelas
